

Oleh: Ahmad Syauqi Ahsan

Instalasi

- Dua cara untuk menginstall Yii2 framework
 - Meng-copy dari template
 - Menggunakan Composer (recommended)
- Ada dua jenis template untuk Yii2, Basic Template dan Advanced Template.
- Berbeda dengan Basic Template yang hanya terdiri satu aplikasi, Advanced Template terdiri dari dua aplikasi: frontend dan backend.

Instalasi Basic Template

- 1. Pastikan anda sudah memiliki web server (misal: Apache) dengan dukungan PHP
- 2. Download file template Yii2 Basic dari website yiiframework.com
- 3. Extract file hasil download ke lokasi yang dapat diakses dari web
- 4. Buka file config\web.php, kemudian isikan kode rahasia untuk 'cookieValidationKey'
- 5. Instalasi selesai dan anda dapat langsung mengakses aplikasi web anda melalui http://localhost/basic/web/

Instalasi Advanced Template

- 1. Pastikan anda sudah memiliki web server (misal: Apache) dengan dukungan PHP
- 2. Download file template Yii2 Advanced dari website yiiframework.com
- 3. Extract file hasil download ke lokasi yang dapat diakses dari web
- 4. Menggunakan aplikasi Command Prompt, masuk ke folder aplikasi anda kemudian jalankan perintah: "php init". Pilih [0] Development
- 5. Buat sebuah database baru, kemudian ubah file common\config\main-local.php sesuai dengan database yang telah anda buat.
- 6. Migrasi database dengan cara jalankan perintah berikut pada command prompt: php yii migrate
- 7. Instalasi selesai dan anda dapat langsung mengakses aplikasi web anda melalui:
 - <u>http://localhost/advanced/frontend/web/</u> untuk aplikasi frontend
 - <u>http://localhost/advanced/backend/web/</u> untuk aplikasi backend
- 8. Untuk dapat login anda harus mendaftar dahulu melalui menu Signup

Instalasi Menggunakan Composer

- Yii2 direkomendasikan untuk diinstall menggunakan Composer.
- Dengan Composer maka proses update dan penambahan komponen (extensions) akan lebih mudah.
- Untuk menginstall Yii2 dengan Composer, lakukan langkah2 berikut ini:
 - 1. Download Composer dari <u>http://getcomoser.org</u> kemudian lakukan instalasi Composer.
 - 2. Menginstall Composer Asset Plugin. Ketik perintah berikut pada command prompt:
 - composer global require "fxp/composer-asset-plugin:*"
 - 3. Buat token di github.com
 - 4. Menginstall Yii2 dengan Composer. Ketik perintah berikut pada command prompt:
 - composer create-project --prefer-dist yiisoft/yii2-app-basic basic (untuk basic template) atau
 - composer create-project --prefer-dist yiisoft/yii2-app-advanced advanced (untuk advanced template)
 - 5. Langkah selanjutnya disesuaikan dengan template yang anda pilih (basic atau advanced)

🕞 Composer Setup	-	□ ×	谒 Composer Setup	- 🗆 🗙	🕞 Composer Setup	- □ >
n	Composer Setup		Settings Check We need to check your PHP and other settings.		Proxy Settings Choose if you need to u	ise a proxy.

Please review these setti	tings. Click Install to continue with the installation.		Important			Setup has installed Composer on your computer. Usage: Open a command window and type "composer"
PHP version 7.0.6		^	Setup has changed your environment, but not all running pro- this. To use Composer for the first time, you will have to do or	rams will be aware of ie of the following:	1	Click Finish to exit Setup.
Add to User environmer http_proxy = 10.25	nt: 52. 105. 100: 3128	>	- Open a new command window. - Close all File Explorer windows, then open a new commar - Logoff and Logon again, then open a new command wind	id window. ow.		View online documentation
	< Back Install	Cancel	C	<u>Next</u> >		< Back Einish

2. Menginstall Composer Asset Plugin

- Sebelum menggunakan Composer, anda perlu menginstall Composer Asset Plugin.
- Ketik perintah composer global require "fxp/composer-assetplugin:*" dari jendela command prompt.
- Langkah ini hanya perlu anda lakukan sekali saja.

Select C:\Windows\system32\cmd.exe	_		×
Microsoft Windows [Version 10.0.14393] (c) 2016 Microsoft Corporation. All rights reserved.			
C:\Users\Syauqi>composer global require "fxp/composer-asset- Changed current directory to C:/Users/Syauqi/AppData/Roaming ./composer.json has been created Loading composer repositories with package information Updating dependencies (including require-dev) - Installing fxp/composer-asset-plugin (v1.2.2) Downloading: 100%	plugin: /Compos	:*" 5er	
Writing lock file Generating autoload files			
C:\Users\Syauqi>			
			~

3. Buat Token d

- Sign-in pada website github.com (buat akun terlebih dahulu bila belum punya).
- Masuk menu Setting->Personal access tokens
- Klik tombol Generate new token
- Klik tombol Copy Token untuk mengcopy token ke clipboard

Personal access tokens

3. Menginstall Yii2

- Buka jendela command prompt dan pastikan anda telah berada pada direktori yang dapat diakses dari web (misal: c:\xampp\htdocs).
- Ketik perintah: *composer create-project -- prefer-dist yiisoft/yii2-app-basic my_basic*
- Klik icon cmd di kiri atas -> Edit -> Paste untuk mem-paste token yang telah anda copy pada langkah sebelumnya. (token hanya perlu dimasukkan satu kali saja)
- Tekan tombol *Enter*.

Yii Requirement Checker

- Anda dapat melakukan pengecekan apakah webserver anda sudah memenuhi syarat yang dibutuhkan oleh aplikasi berbasis Yii2.
- Pada web browser, ketik url: http://localhost/my_basic/requirements.php

Conclusion

Your server configuration satisfies the minimum requirements by this application. Please pay attention to the warnings listed below and check if your application will use the corresponding features.

Details

Name	Result	Required By	Memo
PHP version	Passed	Yii Framework	PHP 5.4.0 or higher is required.
Reflection extension	Passed	Yii Framework	
PCRE extension	Passed	Yii Framework	
SPL extension	Passed	Yii Framework	
MBString extension	Passed	Multibyte string processing	Required for multibyte encoding string processing.
OpenSSL extension	Passed	Security Component	Required by encrypt and decrypt methods.
Intl extension	Passed	Internationalization support	PHP Intl extension 1.0.2 or higher is required when you want to use advanced parameters formatting in <code>vii::t()</code> , non-latin languages with <code>Inflector::slug()</code> , <code>IDN-feature of <code>Emailvalidator</code> or <code>urlvalidator</code> or the <code>yii\lisn\Formatter</code> class.</code>
ICU version	Passed	Internationalization support	ICU 49.0 or higher is required when you want to use # placeholder in plural rules (for example, plural in Formatter:asRelativeTime()) in the yii\fisn\Formatter class. Your current ICU version is 54.1.
Fileinfo extension	Passed	File Information	Required for files upload to detect correct file mime-types.
DOM extension	Passed	Document Object Model	Required for REST API to send XML responses via $\texttt{yii} \ \texttt{web} \ \texttt{xmlResponseFormatter}$.
PDO extension	Passed	All DB-related classes
